

LIST OF AWARDED CONTRACTS ABOVE USD 15,000 IN 2024

20 May 2025 VERSION

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
1	Millennium Ecologic Museum	Cameroon	2024	This project aims to assess local food systems and the sustainability of household dietary intake within hunter-gatherers' societies of central Africa	EUR	82,551
2	Meise Botanic Garden	Belgium	2024	To support activities in direct continuation of FORESTS-Phase II which are defined as a substantial contribution to the integrated development of the Yangambi Landscape (www.yangambi.org). The specific objectives aim at the conservation and enhancement of biodiversity while contributing to the sustainable development of selected value-chains and the local populations.	EUR	518,062
3	Millennium Ecologic Museum	Cameroon	2024	This research aims to assess the value chain of processed NTFP in central Africa (Cameroon and Gabon).	EUR	79,850
4	Institut de Recherche pour le Développement	France	2024	This research aims to analyze natural and anthropogenic processes which contribute to the densification of woody trees as well as the increase in carbon stocks in the Guinean periferest savannahs	EUR	70,000
5	Université Catholique de Louvain	Belgium	2024	This project aims to analyze the intrinsic sustainability of the original ways in which Bubinga is used in the socio-cultural imaginations and pharmacopoeia of indigenous peoples.	EUR	217,000
6	Université de Liège	Belgium	2024	This project aims to assess the economic and social impacts of CITES measures on the industrial timber sector in four Central African countries (Cameroon, Gabon, Republic of Congo and Central African Republic).	EUR	154,501
7	Double-Helix Consulting	USA	2024	The purpose of this agreement is to leverage the Consultant's extensive network (domestically and internationally) to develop linkages with private sector actors for agricultural products as well as landscape goods and services. This partnership agreement aligns closely with the work of other partners such as NPRL (branding and investment), Kamapim (training and agricultural value chains), Envirium (international market development), NPCB (Provincial government engagement) and MCF (community engagement).	EUR	390,070
8	SETYM International	Canada	2024	The main objective of this continuation is to enable the selected projects to perfect the concepts and procedures learned during the initial training	EUR	25,250

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
9	Institute for Social Research in Africa	Kenya	2024	This project aims to strengthen the understanding and knowledge of social interactions taking place in the management practices in the Makokou region forests (Ogooué Ivindo province, Gabon) in order to improve the prospects of sustainability in the medium and long term. It will focus on the complementary economic pillars of forestry (industrial and artisanal / formal and informal), agriculture (local farming and agro-forestry in community forests as well as agro-industrial projects) and mining (small scale and industrial).	EUR	237,142
10	Solutions for Wildlife	Democratic Republic of Congo	2024	The specific objective is to contribute to the conservation and enhancement of biodiversity and ecosystem services in the Yangambi Landscape, by preserving the integrity of conservation areas (including the Yangambi Biosphere Reserve) and improving management/governance. Specifically: - Set up monitoring of emblematic species in the Reserve and create a ranch - Carry out eDNA analysis of water samples and microbiological analysis of bushmeat - Building local capacity to monitor and conserve emblematic species through environmental education and behaviour change - Setting up a wildlife sanctuary - Support micro-projects as alternatives to hunting and the sale of game - Carry out a study on the effectiveness of alternative activities to hunting and the sale of bushmeat	USD	93,992
11	Tree Aid	Burkina Faso	2024	Tree Aid is implementing forest development and governance, natural resource management, and an enterprise development focused project in Amhara, Oromia, and SNNP regions of Ethiopia. Tree Aid will lead WP3, and support WP4 and WP6 in Amhara region.	GBP	58,500
12	University of Antwerp	Belgium	2024	This research aims to develop a biocultural paradigm – that links biological and cultural systems – for conservation research and policy in the DRC’s rainforest that is sensitive to a) cultural diversity and inequities within communities (particularly in relation to gender relations) as well as b) connections between communities and broader political and economic structures/forces.	EUR	249,686
13	SRI Executive Search Ltd	Ireland	2024	Development of AWARD Resource Mobilization Strategy, inclusive of key donor engagement strategies and a supporting action plan.	USD	45,000
14	Unique Land Use	Germany	2024	To produce a work plan as part implementation of the project titled ‘The right tree in the right place for the right purpose: supplying high-quality tree planting material of native tree species (NTS) for landscape restoration in Sub Saharan Africa (RTRP-Seed).	EUR	2,903,183

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
15	Globe Consulting sarl	Democratic Republic of Congo	2024	The objective of the agreement is for the Partner to undertake activities described in Annex 1 – Work Plan as part of the implementation of the projects titled FORETS FOOD, FORETS AGRI, and FORETS-III in the Democratic Republic of Congo in accordance with this agreement and the annexes mentioned in Article 6. In the scope of this assignment the following services will be delivered in consultation with the CIFOR Project Manager: 1. Lead the local teams of personnel involved in the daily project activities and develop their capacity to perform according to international labor standards; 2. Prepare and maintain proper administrative and financial documentation in the scope of the above-mentioned activities such as reports, mail, e-mails, contracts, accounting, documentation (receipts, invoices, petty cash reports, bank statements, etc.); 3. Closely monitor expenditure and provide guarantee against non-eligible expenditure; 4. Upon request from CIFOR’s Project Manager, contribute on CIFOR’s technical report to donors, and assist CIFOR and its partners in audits, evaluation, monitoring and other type of controls; 5. Facilitate organization and enhance project efficiency in terms of institutional behavior of supported human resources (relationship management, assets management, safety); 6. Support negotiation processes to prevent conflicts, assist in conflict resolution, defend CIFOR and CIFOR partners’ interests including legal mitigation if deemed necessary.	EUR	1,138,411
16	Yayasan Riak Bumi	Indonesia	2024	The purpose of this agreement is to conduct a systematic survey of the orangutan populations, including identifying possible supporting factors. CIFOR and Riak Bumi will also facilitate the making of an educational video for students, different government sectors, and general audience, to raise knowledge and awareness on the orangutans behaviour.	IDR	366,840,000
17	Entraide Multisectorielle pour la Survie et le Développement en RDC (EMSude-RDC)	Democratic Republic of Congo	2024	To carry out the objectives stated in Annex 1 of the agreement	EUR	133,121
18	Botanic Gardens Conservation International	United Kingdom	2024	To produce a work plan as part implementation of the project titled ‘The right tree in the right place for the right purpose: supplying high-quality tree planting material of native tree species (NTS) for landscape restoration in Sub Saharan Africa (RTRP-Seed).	EUR	2,006,770
19	Efeca	United Kingdom	2024	Examine the extent to which the project effectively achieved its outcomes as well as determine and assess factors, enabling conditions, and lessons learnt in achieving these goals.	USD	99,800

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
20	Regional Centre for Mapping of Resources for Development	Kenya	2024	The overall objective of the project is to ensure forests, biodiversity and seascape ecosystems in Eastern and Southern Africa are sustainably managed and continue providing ecosystem services and contribute to the well-being of the populations, by providing improved, regular and updated information for informed decision making. The specific objectives (SO) are i) that the regional centre of excellence for Eastern and Southern Africa becomes a reference point for updated information, able to influence policy decisions in the region on forestry and biodiversity, contributing to the regional and global agenda on forests and biodiversity; and ii) that cross-sectoral and cross-regional coordination and strategic steering of RCoEs to address STI green transition challenges is improved. The geographical scope covers Eastern and Southern African Countries: Angola, Botswana, Comoros, Djibouti, Eritrea, Eswatini, Ethiopia, Kenya, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Rwanda, Seychelles, Somalia, South Africa, South Sudan, Sudan, Tanzania, Uganda, Zambia and Zimbabwe. The two main implementing partners are CIFOR (coordinating partner) and RCMRD. To support the RCoE, this partnership builds on strong links between research and technology. It brings in institutions with experience in research and technology.	EUR	3,500,000
21	INSTITUTO SOCIEDADE POPULACAO E NATUREZA – ISPN	Brazil	2024	The ARCA program’s implementation will rely on strategic partnerships with implementing partners and other institutions: <ul style="list-style-type: none"> • that have a long-standing presence, credibility and a vast network of local partners in each sub-landscapes • that are widely recognized for their track record, ethics, and contribution to social-environmental goals in Brazil; • that have clear synergies and complementarities with CIFOR-ICRAF’s approaches and modus operandi, with a potential for mutual growth and development; • with whom we (CIFOR-ICRAF) have a solid foundation of mutual trust due to prior relationships or ongoing partnerships, and; • that share CIFOR-ICRAF’s values and principles underlying interventions. 	USD	283,887
22	Yayasan Krisna Galensya	Indonesia	2024	To implement activities at the sub-landscape and village levels that potentials to increase the adoption of climate-smart agricultural technologies, the integration of value chains and food security technology practices.	USD	106,628
23	Landscapes for Future	Latvia	2024	To design a blended fund with a tentative pipeline consisting of CIFOR-ICRAF’s projects and to provide the Board and Senior Leadership Team of CIFOR-ICRAF with all the relevant information to make the decision to engage in subsequent phase of the creation of the fund.	EUR	36,000

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
24	Conservation Visions	Canada	2024	To produce a further gap analysis to identify areas that are not adequately covered by existing guidance developed under relevant multilateral environmental agreements and by competent intergovernmental organizations. The gap analysis will consider the seven key elements of effective policy for the sustainable use of wild species identified in the IPBES Thematic Assessment Report on the Sustainable Use of Wild Species. a) Inclusive and participatory decision-making b) Inclusion of multiple forms of knowledge and the recognition of rights c) Equitable distribution of costs and benefits d) Policies tailored to local, social and ecological contexts e) Monitoring of social and ecological conditions and practices f) Coordinated and aligned policies g) Robust institutions, from customary to statutory The CPW will contribute to the gap analysis, the results of which, including the revised list, will be submitted to the CBD Conference of the Parties for consideration at its sixteenth meeting. In addition, CBD Secretariat will incorporate inputs on Sustainable Wildlife Management on draft document for SBSTTA – 26, addressing recommendation 25/3 to undertake a comprehensive review and analysis of existing tools and guidance that can support the implementation of the targets and other elements of the Framework.	GBP	15,000
25	National Institute of Research in Human and Social Science (INRSSH)	South Africa	2024	This project aims to examine the strengths and weaknesses of the modes of governance put in place in certain Central African forest areas with regard to better integration of local communities and indigenous peoples, with particular attention to the inclusion of the latter's naturalist knowledge, which could be the subject of social and cultural enhancement	EUR	133,878
26	Lembaga Peduli Sejahtera dan Lestari (PELITA) Sumba	Indonesia	2024	To support data collection and field missions	IDR	57,911,760
27	Centre de Coopération Internationale en Recherche Agronomique pour le Développement	France	2024	Coordination and general edition of the State of Protected Areas; participation in knowledge production (EDF, policy analysis, various publications) ; production of knowledge through complementary syntheses on different relevant themes in Central Africa; facilitation or co-facilitation of partnerships with data providers and their analysis on key targeted themes for Central Africa; contribution to the consolidation of OFAC databases; and participation in information and training of decision-makers and managers on targeted themes important for Central Africa.	EUR	600,056

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
28	Instituto Ouro Verde	Brazil	2024	a) Promoting sustainable forms of production, strengthening networks of co-learning and collaboration between groups of family farmers in the northern region of the state of Mato Grosso (Portal da Amazônia territory); b) Strengthening the ecosystem of services to support sustainable production, especially activities related to the commercialization of socio biodiversity products, the existing microcredit system in the region and the research to generate scientific evidence focused on the use of regional biodiversity to improve food production systems; c) Increase the capacity of farmers, educational institutions, extension technicians and environmental protection agencies to work with an approach focused on agroecology and forest restoration; d) Strengthening new rural leaders, especially young people, working in regional coordination, mobilization and dissemination of sustainable production practices.	USD	413,134
29	INSTITUTO SOCIOAMBIENTAL – ISA	Brazil	2024	The ARCA program’s implementation will rely on strategic partnerships with implementing partners and other institutions: <ul style="list-style-type: none"> • that have a long-standing presence, credibility and a vast network of local partners in each sub-landscapes • that are widely recognized for their track record, ethics, and contribution to social-environmental goals in Brazil; • that have clear synergies and complementarities with CIFOR-ICRAF’s approaches and modus operandi, with a potential for mutual growth and development; • with whom we (CIFOR-ICRAF) have a solid foundation of mutual trust due to prior relationships or ongoing partnerships, and; • that share CIFOR-ICRAF’s values and principles underlying interventions. As a general guideline, in each sub-landscape implementing partners will lead activities carried out at the local level albeit with methodological backstopping and technical support from CIFOR-ICRAF. At the landscape scale, CIFOR-ICRAF will generally lead outputs related to science, technological solutions and capacity-building, whereas Implementing Partners will usually lead governance processes and activities aimed at building the capacity of grassroots organizations and local development agencies. Other institutional partners will also be involved in different aspects of activities and outputs at various scales depending on their institutional mandates, networks, geographic coverage and area of expertise.	USD	553,684
30	International Fertilizer Development Centre (IFDC)	USA	2024	The objective of the agreement is for the Partner to undertake activities described in Annex 1 – Work Plan as part implementation of the project titled Regional Soil Fertility Mapping Project	USD	43,667

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
31	Partenariat Public Privé- Développement Durable dans le Paysage de Yangambi	Democratic Republic of Congo	2024	To implement project activities as follows: 1. Production of acacia seedlings 2. Rental of land for carrying out reforestation activities and adaptation to climate change (agroecology, nurseries, fruit trees, etc.) 3. Maintenance of the coffee branch collection (cleaning, weeding, etc.) 4. Operational support (vehicles and motorcycles for business travel, office supplies, consumables for generators, equipment, internet, etc.) Rehabilitation & maintenance of roads and tracks necessary for the conduct of activities, bonuses for nursery workers and other facilities necessary for project activities 5. Improved seeds (cowpea, corn, rice, etc.) / end. improved cassava / pods / coffee seedlings, etc. 6. Activities carried out within the framework of the DDPY-PPP by the General Management of INERA (preparation and participation in CAs, administrative procedures, etc.) 7. Activities carried out within the framework of the PPP-DDPY by the Yangambi Research Center	USD	166,837
32	Zambia Community Based Natural Resource Management	Zambia	2024	Promote the use of the landscape approach in Zambia for livelihoods and adaptation to climate change, democracy and governance work under the project “Operationalising the landscape approach for biodiversity benefits: policy, practice and people”	EUR	30,000
33	Connect to CARE	Kenya	2024	The project engages CTC, a charitable consulting firm specializing in strategic partnership facilitation and project management, to facilitate and conduct technical support in partnership with the PMU, a needs assessment for, and co-design of, an integrated evidence-based planning and management facility and associated capacity building and implementation planning	USD	56,336
34	International Center for Agricultural Research in the Dry Areas	Lebanon	2024	ICRAF subcontracts ICARDA to implement the services as described in Annex 1 of the agreement. The primary objective of this study is to explore how the development of holistic metrics and assessment approaches can support agroecological transition and identify priority areas for future investment. Specifically, and with a focus on Tunisia	USD	42,000
35	Resources and Synergies Development	Latvia	2024	The objective of the agreement is for the Partner to undertake activities described in Annex 1 – Work Plan as part of the implementation of CIFOR’s activities in the YEL, in accordance with this agreement and the annexes mentioned in Article 6 below.	EUR	80,054

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
36	Resources and Synergies Development	Latvia	2024	This project is implementing a series of activities as part of the intervention entitled Governance Support Project, the Agricultural and rural integration and training in Tshopo (GIFT), implemented by Enabel as part of the financing agreement between the French Development Agency and Enabel. It is developed from a series of documents, knowledge and practical experiences acquired in the Yangambi Landscape by CIFOR and its partners through the implementation of several past and present actions (e.g. the Training, Research action and Environment in Tshopo – FORETS – phases I and II, financed by the European Union). The work is largely based on ongoing actions (notably those relating to the implementation, awareness-raising and popularization of agroecological practices, in addition to those relating to environmental education and engagement with several educational institutes, including some ITA) in the Yangambi landscape, by intensifying and expanding the strengthening of agricultural and rural training institutes to offer services contributing to climate resilience in their areas of operation.	EUR	710,416
37	Forêt Ressources Management	France	2024	To address challenges for sustainable management of forest ecosystems of Central Africa and the well-being of the people who depend on them and of all humanity, through decision-making based on credible and regularly updated information. Role of FRMi in the consortium: Leading the technical team; Consolidation and implementation of the observatory's data collection system ; animation of data collection ; management of the information system and its tools, development of new tools for the information system (collection, analysis, dissemination, with particular emphasis on geoservices) ; design of monitoring tools for the NaturAfrica Indicators ; contribution to the development of publications and the promotion of information and tools developed at OFAC ; contribute to knowledge generation, establish and facilitate partnerships with data supplier partners ; validation deliverables produced by subcontractors Visioterra, Fabre and MacArnolds.	EUR	2,220,120
38	National Bureau of Plant Genetic Resources	India	2024	To pilot and validate the protocol and system for maintaining individual passport data through real-time and passive chip-based technology for monitoring the accessions in the field genebanks at three locations	INR	736,740
39	Yayasan Sulawesi Cipta Forum	Indonesia	2024	To implement activities at the sub-landscape and village levels that potentials to increase the adoption of climate-smart agricultural technologies, the integration of value chains and food security technology practices.	USD	110,718

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
40	Natural Resources Institute - University of Greenwich UK	United Kingdom	2024	ICRAF on behalf of AWARD seeks to engage The Natural Resources Institute (NRI) to produce a report on Status of Women in Agrifood Systems in Africa . The report will generate evidence and increase awareness on the persisting gender gaps and structural gender inequalities in agrifood systems in sub-Saharan Africa to better inform policies, strategies, programs, and budgetary decisions and to build a case for sustained investments in promoting gender equality in agrifood systems. The report also aims to produce evidence to influence decision-making in the transformation to equitable, inclusive and sustainable food systems. This involves undertaking an evidence review to collate, analyze and integrate evidence on the intersectional gendered aspects and dynamics of agri-food systems.	USD	77,700
41	University of Lausanne (UNIL)	Switzerland	2024	This aims at facilitating and studying the management and community governance of hunting at the scale of all twenty-one villages in our project landscape. Specifically, the research will: <ul style="list-style-type: none"> • Analyze the spatial and temporal dynamics of bushmeat across all the 21 villages in the study landscape. • Understand how this data is used (or not) in decision-making by these villages – and the way in which gender takes part – in their management and community governance of hunting. • Identify the social and ecological conditions that facilitate or prevent the establishment of community hunting management and governance. 	EUR	250,000
42	Statistics for Sustainable Development	United Kingdom	2024	The objective of the agreement is for the Partner to undertake activities related to “Development of online platforms and data management” as described in Annex 1- Work Plan.	USD	100,800
43	CARE France	France	2024	The objective of the agreement is to implement, in a consensual manner, the activities described in Annex 1 – Responsibilities of the parties in the framework of the implementation of the project entitled Green Northern Cameroon – Integrated Territorial Governance (CASEVE-GTI) in accordance with this agreement and the annexes mentioned in Article 6 .	EUR	799,762
44	MARINA	Brazil	2024	The main objective of the assignment is to draft the third part of the report, i.e., on policies and their relevance (and impacts) for different archetypes.	USD	15,000

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
45	CENTRE DE SUIVI ECOLOGIQUE (CSE)	Senegal	2024	The overall objective of the project is to ensure that West Africa's forests, biodiversity and marine ecosystems are managed sustainably and continue to provide ecosystem services and contribute to the well-being of populations, providing improved, regular and updated information for informed decision-making. The specific objectives (SO) are as follows: i) that the regional center of excellence for West Africa becomes a reference point for up-to-date information, capable of influencing policy decisions in the region on forestry and biodiversity, thus contributing to the regional and global agenda on forests and biodiversity; and ii) that intersectoral and interregional coordination and strategic management of CREs to meet the challenges of the ecological transition in terms of STI are improved.	EUR	4,350,000
46	The University of Natural Resources and Life Sciences, Vienna (BOKU)	Austria	2024	The objective of the agreement is for the BOKU University to undertake activities described in Annex 1 – Work Plan as part implementation of the project titled the project titled Strengthening Transdisciplinary Agroecological Research (STAR),	USD	75,000
47	Institute for Forestry and Sustainable Development (IFSD)	Vietnam	2024	Partner to support ICRAF on ensuring the quality and progress of research, coordination of project activities and integration of results into local policies, programs and projects related to agriculture and forestry to replicate, increase impact, and bring benefits for both sides and people in the district. And support ICRAF in establishing and maintaining good relationships with local authorities, communities, other relevant organizations, and projects in the project area.	GBP	57,176
48	Kenya Agricultural and Livestock Research Organization	Kenya	2024	<ul style="list-style-type: none"> • To boost access to high quality, diverse, and climate resilient tree-planting material and ensure that quality tree seeds and seedlings are planted in the right places, for the right purposes. • The project will design and improve the seed and seedling supply systems to support restoration of these degraded landscapes and support biodiversity and food security. • The project will implement Climate Appropriate Portfolios of Tree Diversity (CAPTD) for all kinds of tree planting in the target landscapes through a series of interlinked and overlapping steps. • Compile an information catalogue that lists the food tree species available from KALRO nurseries across Kenya. 	USD	34,024
49	Map of Life Solutions	USA	2024	Provision and Implementation of services as described in Annex 1	USD	218,100

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
50	Rationale Advisors	Singapore	2024	The partnership between the RA Group and CIFOR will support the implementation of the FACT Roadmap across the thematic areas of Smallholder Support, Trade and Markets and Traceability and Transparency by 1. Provision of ongoing support in relation to the preparation of knowledge products, expert seminar sessions and case studies in relation to the thematic areas of Smallholder Support and Trade & Markets (sustainable productions and national markets), including through participation in meetings with co facilitation countries and stakeholders as required. 2. A leadership role in the preparation of Action Group meetings for all thematic areas, including communications with co facilitation and other countries, facilitation as required, agenda preparation, and preparation of summaries. 3. Concerning the thematic area of Traceability and Transparency, a leadership role on the revision and implementation of the Delivery Plan, including in relation to the development of guidance as per the FACT Roadmap, as well as provision of support for knowledge products as required, in collaboration with the co facilitation countries. 4. On the subject of stakeholder engagement, provision of a leadership role in the revision and update of the stakeholder engagement strategy and support as required concerning the coordination of stakeholder engagement.	GBP	670,040
51	University of Ibadan	Nigeria	2024	To formalize the collaboration between University of Ibadan and CIFOR in the implementation of a pilot short course on the governance of landscape restoration.	CAD	15,000
52	SAHEL ECO EVERGREEN	Mali	2024	The objective of the agreement is for the Partner to undertake activities described hereunder: 1. Enhanced uptake and effectiveness of sustainable land management, land restoration and integrated landscape management practices within the broader Great Green Wall area. 2. Improved land health and vegetation monitoring and intervention targeting within the broader Great Green Wall area. 3. Enhanced policy and institutional enabling environment for sustainable management and livelihoods within the broader Great Green Wall area.	EUR	18,992
53	Statistics for Sustainable Development	United Kingdom	2024	The objective of the agreement is for STATS4SD to undertake activities described in Annex 1 – Work Plan as part of the implementation of the project titled Transformative Land Investment	USD	32,975

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
54	Centre de Recherche et d'Action pour le Développement Durable	Cameroon	2024	To identify the lessons learned from the first 3 years of RESSAC's implementation.	EUR	34,160
55	BongoHive	Zambia	2024	Overall objective of this Z4ABC's business incubation services provision is to develop entrepreneurial environment conducive for novel business development around climate-smart agriculture, sustainable forestry, certification and fair-trade approaches and innovation tailored for rural communities, especially targeting rural youth and women, as well as for small and medium size enterprises relevant to the target VCs. The purpose of this proposed service contract is increased capacity of the Z4ABC pilot community members, especially youth and women, to develop and run sustainable businesses, as well as enhance the market opportunities for the targeted VCs through development of new innovative products by selected SMEs and researchers.	EUR	90,000
56	Université Catholique de Louvain	Belgium	2024	CIFOR's four-year programme "Central African Forest Observatory – Centre of Excellence (OFAC-CE)", from 2024 until 2028, funded by EC, aims to address challenges for sustainable management of forest ecosystems of Central Africa and the well-being of the people who depend on them and of all humanity, through decision-making based on credible and regularly updated information. Therefore, OFAC-CE will support OFAC to fully exercises the role of Centre of Excellence within COMIFAC, through the provision of credible information generated and updated on forest ecosystems in Central Africa for their sustainable management and in response to user requests. UCL will contribute to the development of tools and to the data display and analysis portal (map production, deforestation alert systems, data quality), - Consolidation or even production of knowledge and design of NaturAfrica monitoring tools, - Contributing to the development of OFAC publications with a particular focus on forest cover monitoring, - Ensure capacity building in the field of geodata and satellite earth observation, - Facilitate the development of partnerships with AGEOS, OSFAC and other space agencies at global level (GEO, ESA, NASA, etc.). Resources mobilised: - International expertise in remote sensing and mapping, - Trainers in remote sensing and geographic information systems and , - Host laboratory for short internships and training courses.	EUR	552,000

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
57	Mtandao wa Jamii wa Usimamizi wa Misitu Tanzania	Tanzania	2024	The overall objective of the project is to ensure forests, biodiversity and seascape ecosystems in Eastern and Southern Africa are sustainably managed and continue providing ecosystem services and contribute to the well-being of the populations, by providing improved, regular and updated information for informed decision making. The specific objectives (SO) are i) that the regional centre of excellence for Eastern and Southern Africa becomes a reference point for updated information, able to influence policy decisions in the region on forestry and biodiversity, contributing to the regional and global agenda on forests and biodiversity; and ii) that cross-sectoral and cross-regional coordination and strategic steering of RCoEs to address STI green transition challenges is improved. The geographical scope covers Eastern and Southern African Countries: Angola, Botswana, Comoros, Djibouti, Eritrea, Eswatini, Ethiopia, Kenya, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Rwanda, Seychelles, Somalia, South Africa, South Sudan, Sudan, Tanzania, Uganda, Zambia and Zimbabwe. The two main implementing partners are CIFOR (coordinating partner) and RCMRD. To support the RCoE, this partnership builds on strong links between research and technology. It brings in institutions with experience in research and technology. To achieve the objectives, CIFOR is partnering with the Community Forest Conservation Network of Tanzania, locally known as Mtandao wa Jamii wa Usimamizi wa Misitu Tanzania (MJUMITA). The network is involved in participatory forest management in Tanzania and provides a forum for capacity building, advocacy and communication for communities to sustainably manage forest and improve their livelihoods.	EUR	30,069
58	Bureau of Agriculture and Natural Resources (BOANR)	Kenya	2024	BOANR is the regional partner with whom PATSPO II implement all its activities in Tigray Region. Tigray Region is part of PATSPO II's activity area in Ethiopia, ref. project document for PATSPO II.	USD	70,000
59	Duke University	United Kingdom	2024	To understand and assess the social impacts of FSC certification in Brazil.	USD	56,000
60	Tegemeo Institute of Agricultural Policy and Development (TIAPD)	Kenya	2024	Tegemeo Institute will provide technical backstopping to GRASP cohort 1 Policy Fellows, supporting the design and implementation of their Policy Innovation Projects (PIPs) by imparting practical skills on identified capacity gaps through targeted webinars, editing and packaging policy information products e.g. factsheets, policy briefs, abstracts etc. from time to time and any other relevant support to the PIPs as requested by the AWARD	USD	16,560

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
61	University Mohamed Six Polytechnique (UM6P)	Morocco	2024	The Partner is undertaking activities described in Annex 1 – Work Plan as part implementation of the project titled Regional Soil Fertility Mapping Project . These include. 1.To train technicians in Gambia in soil suitability evaluation, tropical soil fertility, and fertilization. 2. To support 3 MSc. theses projects in the areas of fertilizer science and technology that will be implemented in Gambia	USD	21,728
62	VARDA AG	Eswatini	2024	The objective is for the Varda to undertake the execution of the activities described in Annex 1 – Work Plan, as part implementation of the project titled RAF-23/0014, Digital platform for Soil Health knowledge exchange.	USD	134,559
63	National Forestry Resources Research Institute	Uganda	2024	To enhance security of the Field Genebank sites (fences, guarding), routine management of the field sites (weeding, tree pruning and fire control), data collection and management (characterization and evaluation), productive material (seeds, scions, cuttings) distribution and tree health (pest and diseases) monitoring and control.	AUD	30,076
64	Sociedad Peruana de Derecho Ambiental - SPDA	Peru	2024	This partnership between CIFOR-ICRAF and the Sociedad Peruana de Derecho Ambiental (SPDA) will center on the development of activities and outputs under Work Package 4, and one output under Work Package 1. SPDA staff involved in the project will be in close contact with government officials at the national and subnational level to support the impact pathway of the project’s research activities.	GBP	120,407
65	Kenya Agricultural and Livestock Research Organization	Kenya	2024	The field genebanks have not had any financial support since 2021 putting these valuable resources at risk. Hence the ICRAF Genebank urgently requires new sources of financial support to ensure the long-term conservation and utilization of these valuable genetic resources. The Australian Centre for International Agricultural Research (ACIAR) funds are to support the maintenance of the much-threatened field genebanks.	AUD	46,162
66	Forest Tree Solutions, LLC	USA	2024	The LLC expert (David Neidel) will provide partnership support, strategic guidance and provide fundraising support to Yale-ELTI field affiliates, implement Yale-ELTI’s monitoring and evaluating activities, report on Yale-ELTI’s program processes, results, and outcomes, and facilitate YSE student research and internships	USD	76,418

67	Flinders University	Australia	2024	The University of Flinders and Center for International Forestry Research (CIFOR) have signed a strategic research collaboration in which the two parties will collaborate in jointly conduct research on designing effective, efficient, and equitable climate change policies and project. This project is a part of research collaboration activities. The joint project aims to understand opportunity and challenges for Vietnamese stakeholders to design and implement climate change and low emission food system Vietnam.	USD	64,080
68	ANADER CDI	Côte d'Ivoire	2024	ANADER partners with ICRAF in the implementation of Scolur project in Cote D'Ivoire	XAF	81,529,127
69	Flinders University	Australia	2024	The objectives of this partnership is to provide technical tasks and to carry out the following activities: • Actively engage with GAC and Care Canada in close collaboration with CIFOR to carry research, increase project visibility and explore funding future opportunities and fundings. • Work closely with CIFOR, CARE Canada, CARE Vietnam and Vietnamese partners to develop and submit to GAC project financial and technical reports, M&E reports and other reports required by GAC • Take the lead in coordinating with government of Vietnam, Global Affairs Canada, Care Canada and Care Vietnam on technical work and working permissions for CIFOR team and UBC to work in Vietnam	CAD	799,230
70	Flinders University	Australia	2024	This partnership between University of Flinders and Center for International Forestry Research (CIFOR) aims to address all three challenges mentioned below as well as jointly implement all three project intervention. Challenges encompass (i) lack of a legal framework for the blue carbon market; (ii) lack of vision, policy, data, understanding, skills, networks and platforms for policy makers, the private sector, practitioners and Indigenous Peoples and Local Communities (IPLCs) to design and implement blue carbon policies and projects that uphold the high quality-high integrity environmental and social standards for mangroves and coastal communities; and (iii) limited political space and opportunities for disadvantaged groups (IPLCs, women and youth) to influence, access and benefit from the blue carbon market, leading to further inequality	USD	88,517

71	Instituto de Investigaciones de la Amazonía Peruana	Peru	2024	This partnership aims to assess the effectiveness of sustainable practices in palm swamp peatlands on biodiversity and climate change mitigation by evaluating changes in tree population and ecosystem carbon (C) stocks compared to a baseline established at the start of the project (Project Outcome 2). Plot-scale measurement will assess tree species diversity, carbon stocks, and degradation indicators (relationship female:male <i>M. flexuosa</i> , absolute density of <i>M. flexuosa</i> seedlings and juveniles, and density of <i>M. flexuosa</i> and logged trees). Site scaling will be conducted using drone monitoring to assess changes in <i>M. flexuosa</i> density and vegetation C stocks across the forest.	GBP	118,562
72	The Nature Conservancy	USA	2024	This project and partnership seeks to co-develop solutions and bring about lasting change at three geographic scales: local, landscape and regional/subnational scales, with activities aiming at generating knowledge and feeding into policies at the biome and national levels. The program's general objective is to reduce drivers of deforestation and degradation, enhance conservation and restoration of Protected Areas, reduce related greenhouse-gas emissions and biodiversity loss, while also improving livelihoods and the enabling environment for widescale adoption of nature-based solutions at the Amazonian forest-farm interface. These wider goals will be achieved through a combination of interconnected interventions at different scales: local, landscape, and regional/subnational. The program implementation strategy will vary according to the particular local and landscape context, value chain dynamics, and maturity of governance forums. However, key entry points and strategies (sub-objectives) that cut across all geographies, as follows, will seek to address the key assumptions underlying the transformations pathways	USD	142,161
73	Viamo Inc	Canada	2024	The project leverages human-centered design approaches to ensure that digital tools used to deliver agronomic advice are context-specific, practical, and tailored to local conditions. Through collaboration with key stakeholders, including smallholder farmers and extension officers, the project aims to enhance productivity and sustainability in soybean production	USD	19,067

97	Oromia Forest and Wildlife Enterprise	Ethiopia	2023	2024	To address forest loss and land degradation, Ethiopia has embarked on one of the globally most ambitious programmes of forest landscape restoration with a commitment to restore 15 M ha of degraded forest landscapes. Prior to this commitment, Ethiopia's programme for afforestation and reforestation was one of the world's largest and embedded in Ethiopia's Climate-Resilient Green Economy Strategy (CRGE), in the pillar Protecting and re-establishing forests for their economic and ecosystem services, including as carbon stocks. To get the best possible results from Ethiopia's large forest landscape restoration programme it is important to make tree seedlings raised from quality seed available to ensure high survival rate, adaptability, high growth and high production of the outcome from tree planting. Between 2018-2021, PATSPO has worked to make available and ensure access to high quality seeds of the most important tree species for forest landscape restoration and tree planting activities in Ethiopia. Access to high quality, diverse tree seed underpins Ethiopia's ambitious restoration targets as in its Climate-Resilient Green Economy Strategy (CRGE 2011).	USD	29,085
98	Gullele Botanic Garden	Ethiopia	2023	2024	Train the importance of botanic gardens nationally, regionally and globally. The participation of higher officials from Addis Ababa City Administration, GBG and AAU staff is to gain practical experiences on the importance of Botanic Gardens and create a better working environment between GBG and AAU in research and education respectively. The experiences gained from other gardens on techniques in horticulture, conservation, etc.; in improving the working practices of the staff and popularizing the garden to the wider community.	USD	18,132

99	Botanic Gardens Conservation International	United Kingdom	2023	2024	The objective of the agreement is for the Partner to undertake activities described in Annex 1 – Work Plan as part implementation of the project titled ‘Growing threatened trees’ restoration capacity in Côte d'Ivoire’s cocoa landscapes project’. The project outcome aims increase the capability, capacity, and commitment to restore the Botanical Forest of Divo and other areas within the cocoa landscape with native trees, including threatened tree, increased. This will be achieved through activities to reach 3 outputs: 1. Restoration plan for Reserve Botanique de Divo jointly developed by key stakeholders, including actions to counter threats for over 12 threatened tree species known at the reserve by project end 2. Capacity to provide native planting materials of 110 individuals from 20 nurseries and at least three botanical natural resource-related institutions (e.g., Jardin Botanique de Bingerville) increased by October 2023 3. Three government organisations, 3 botanical institutes, 4 cocoa companies and the CDI cocoa government body commit to and support threatened tree conservation and restoration of cocoa landscapes by project end	GBP	30,117
100	Masyarakat Agroforestri Indonesia	Indonesia	2023	2024	The objective of the agreement is for the Partner to undertake activities described in Annex 1 – Work Plan as part implementation of the project titled “Sustainable Farming in Tropical Asian Landscapes (SFITAL)” in accordance with this agreement and the annexes mentioned in Article 6.	IDR	34,525

#	Partner Institution	Partner Country	Original Contract Year	Extension Year	Purpose of agreement	Currency	USD Value
101	Rural Development Centre Momboto	Democratic Republic of Congo	2023	2024	To implement project activities as follows: a) Mentoring of FFS CBF trained by Momboto-RDC (in their local areas). b) Provide guidance and supervise establishment of at least 10 vegetables experimental and production gardens (of 1ha each) with CBF/FFS groups in their local areas within Yangambi landscape. c) Provide on-site training and technical backstopping to the CBFs on areas of pests and diseases management for vegetables and selected cereals (Maize, Soya, rice) and groundnuts. d) Facilitate at least 8 FFS groups' site learning sessions per week, i.e. 4 in Yangambi and 4 in Yanonge. The FFS sessions are carried out in the morning starting from 7 (for about 4 hours). e) Prepare and provide to CIFOR practical and locally adapted (electronic copy) of farmer field guide (module) on vegetable production including protocols for pests and diseases management. f) Follow up and document the CBF training results and impacts. g) Provide detailed activity report to CIFOR on regular (preferred quarterly) basis.	EUR	102,777
102	Solutions for Wildlife	Kenya	2024	2024	The specific objective is to contribute to the conservation and enhancement of biodiversity and ecosystem services in the Yangambi Landscape, by preserving the integrity of conservation areas (including the Yangambi Biosphere Reserve) and improving management/governance. Specifically: - Set up monitoring of emblematic species in the Reserve and create a ranch - Carry out eDNA analysis of water samples and microbiological analysis of bushmeat - Building local capacity to monitor and conserve emblematic species through environmental education and behaviour change - Setting up a wildlife sanctuary - Support micro-projects as alternatives to hunting and the sale of game - Carry out a study on the effectiveness of alternative activities to hunting and the sale of bushmeat	USD	30,000
